

ANDREW LONG

ABOUT ME

Global expertise in marine seismic survey design, acquisition, imaging, and QI. Creative problem solver with hands-on expertise managing multidisciplinary teams, mentoring and training. Champion for the use of AI/ML in O&G, offshore wind, and CCS.

QUALIFICATION

 PhD Geophysics, University of Western Australia

SUBJECT MATTER EXPERTISE

Marine Seismic Technology (Survey Design, Acquisition, Signal Processing, Imaging, 4D, CCS, QI, AI Automation), R&D Management, IP Management, Training and Development

INDUSTRY EXPERIENCE

Chief Geoscientist for New Energy Solutions (NES) using ultra-high-resolution 3D seismic applications for offshore wind farm developments.

Chief Scientist with extensive experience in strategic R&D, technical project management, business development, IP management, and training programs.

Group leader involved in the development and commercialisation of satellite gravity technology
