

DAVID ALSOP

ABOUT ME

A proactive Geologist with strong expertise in all aspects of integrated reservoir characterisation from basin to field scale, completing integrated subsurface projects in basins across the world. Passionate about knowledge transfer, a leader in classroom and field training at Shell.

QUALIFICATION

 MSc. Geology, Adelaide University

SUBJECT MATTER EXPERTISE

Regional Studies, Reservoir Characterisation, Sequence-seismic stratigraphy, Reservoir Modelling, Play Based Exploration, Sedimentology, Production Geology

INDUSTRY EXPERIENCE

Principal Geologist with roles in Brunei, Netherlands and Australia focused on reservoir characterisation (global SME), production geology and Play Based Exploration studies.

Shell Seconded as a Principal Production Geologist and reservoir characterisation SME including technical assurance for field development practices and leading integrated training courses and core workshops.

Senior Exploration Geologist-Sedimentologist for exploration in Australia and internationally, expert in diagenetic modelling, seismic facies and reservoir characterisation for field development planning.
