

MARK LISK

ABOUT ME

A highly experienced geoscientist specialising in oil and gas, geological storage of CO2 and low enthalpy geothermal systems. A contrarian thinker that helps teams recognise opportunities that others miss. Delivers solutions that reduce risk and narrow uncertainty.

QUALIFICATION

PhD Geology Curtin University

SUBJECT MATTER EXPERTISE

Regional Geology, Petroleum Systems Analysis, Trap and Seal Evaluation, Play Based Exploration, Portfolio Renewal, Seismic Interpretation, New Ventures Assessment, R&D Solutions

INDUSTRY EXPERIENCE

Chief Geologist energy consulting business specialising in expert advice, geological data products, multi-client studies and training courses

Principal Geologist working across held acreage, new ventures and regional studies to recognise new opportunities to grow lead and prospect inventories

Senior research scientist leading trap and seal programs through industry funded JIPs and applying innovative new methods for improved hydrocarbon charge assessment
